Message

I am happy to learn that School of Management Science in association with Dr. A.P.J. Abdul Kalam Technical University, Lucknow and The Institution of Engineers (India), UP State Centre, Lucknow is organizing an International Seminar on "Sources of Planet Energy, Environmental & Disaster Sciences (SPEEDS-2019): Impacts of Non-Conventional Energy Sources" during 7th to 8th February 2020. While acknowledging the growth of SMS, Lucknow in a short period of twelve years, I appreciate its perpetual hard work in the fields of contemporary importance which has brought it recognition at national and international level. The world is suffering from the ill effects of Climate Change that is instrumental in rising average temperatures, extreme weather events including disasters & cyclones, shifting animal & human habitats, rising sea levels, and a assortment of other pessimistic impacts on mankind. Loading the atmosphere with green house gases is a man made catastrophes for this situation. Exploitation of natural resourses is by and large largely responsible for this negative collision. The situation has necessitated turning eyes towards exploitation of natural, renewable and non-conventional energy sources to conquer climatic disturbances arising human greed and deeds. The MNRE also focuses at developing and deploying new and renewal energy to supplement the energy requirement of our country. Therefore, harnessing solar and wind energy has been rightly envisaged by the government as one of the solutions to address the issue of green house gas emission mediated climate change and ill effects thereof. I applaud the organizers in meticulously setting up various sub-themes of the seminar and hope that the deliberations and presentations will culminate in prudent recommendations for the policy planners and society in general to protect our environment and make the planet a better place to live for our future generations.

I wish that the seminar is held in most befitting way and succeeds in the objects set forth.

(Narendra Singh Rathore)
