MESSAGE

It is a matter of great pleasure and honor for me writing this message to be included in the souvenir to be brought out on the occasion of the 4th International National Seminar on **"Sources on Planet Energy, Environmental & Disaster Science : Challenges and Strategies (SPEEDS-2017)**. The theme of the seminar is quite appropriate to the present day situation where sustainability of life on earth has become the main agenda item for all researchers, policy makers, regulators, industries and of course the society all over the world. Unless the environment and ecology are protected and preserved, the catastrophes and natural disasters will be unavoidable. Alternative resources of energy, preferably, the renewable resources would have to be searched and technologies will have to be developed to exploit them for ensuring sustainable development.

I am sure, all the essential aspects of energy, environment, ecology, sustainability etc. would be addressed by the eminent speakers in this seminar. The disaster management strategies and the use of technologies to avoid disasters will also, hopefully, be adequately covered.

The faculty and the students will certainly benefit from this seminar. The outcome of this seminar will hopefully, be setting the path forward for SMS School of Management Sciences to reinforce their efforts of building capability of research and innovation.

I extend my heartiest congratulations on the most important occasion.

(Prof. Vinay Kumar Pathak)
Vice Chancellor
